

## „Remmi“ - - - Music-Volume-Remote-Control-Device

Here it comes - Remote Control **without power supply** and **without battery!**

Ideal for all leaders who want to use active speakers or a mixing console! Simply loop in between the output of the music source and the input of the mixer or the active speaker - plug in the plug of your remote cable - and off you go!

### Remmi

**Remmi** is equipped on app. 45x45x20mm with a 3.5mm socket for the remote plug of the remote cable and with two 3.5mm stereo sockets as music input and output. Inside, the two stereo channels are merged by means of decoupling resistors to a mono signal. The amplitude controlled mono signal is fed as two identical signals to a stereo socket, such that this signal feeds both music channels at the mixer's and/or active speaker's inputs.

### Remmi Junior

**But it can also be even smaller!**

**Remmi Junior** is only 25x25x50mm small - it can do the same as its bigger brother. Currently **Remmi Junior** is available in black. In very limited quantities and with waiting time the **Junior** will also be available in pink!

### Order & Prices:

You can order the **Remmi** or the **Remmi Junior** via e-mail: [jrw@ecta.de](mailto:jrw@ecta.de)  
Please use **REMMI** in the subject line so that I can assign it quickly.

There is already a waiting list. Orders are processed in the order in which they are received. When it's your turn, you'll get a message asking you to pay including postage - 2 days after receipt of payment, **Remmi** will go on the journey via DHL.

**Remmi** and **Remmi Junior** each cost **35,00€** plus shipping. I prefer PayPal payments. Shipping costs in EU is **10,00€** uninsured(!)- rest of the world on request.

**ATTENTION!** The remote does **NOT** work with the old Hilton remote cables! Please check this before! Simply unscrew the cover at the remote connector and push the plastic hose back a little. If you see a metal braid as a sheath of a cable, the remote cable is **NOT** usable with this remote control!

**A few words about packaging:** For the sake of the environment, I only use used packaging for shipping, i.e. packaging that has already been shipped. Of course, I also do without the "pretty" plastic blister packaging. 😊

**Should there be any problems...** ...we can talk about anything. I'm testing each *Remmi* for correct function and structure before it is sent out! Should there be any reason for a complaint, just let me know and we will find a solution.

This is the Remote Plug input.

One of those ist he input, the other one ist he output – and it does not matter wich way you connect your cabels – Remmi will work either way!

**Questions, orders please to:**
